

Assignment 3

(25th August, 2023)

Create a python program using boto of the followings:

- Launch an *t2.micro* Amazon Linux instance.
- Launch two more *t2.nano* Ubuntu instances.
- List all the running instances.
- Check health of the running instances.
- host an http server in the *t2.micro* instance.
- Stop the running instances.
- Terminate the running instances.
